

INDUSTRIAL AUTOMATION PRODUCT

MU-TAIH12 51304337-100

MU-TAIH12 High-Level Analog Input/STI FTA

Honeywell MU-TAIH12 51304337-100 is the MU-TAIH12 High-Level Analog Input/STI FTA used for termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution in a documented PM/APM/HPM Process Manager I/O installation. Confirm the complete identity and installed system configuration before replacement.

CONTROLLED ENGINEERING COPY

IDENTITY	VERIFIED VALUE
Manufacturer	Honeywell
System family	PM/APM/HPM Process Manager I/O
Part number	MU-TAIH12 51304337-100
Document status	Controlled product and system reference

DOCUMENT SCOPE

Exact article identity, official technical data, host matching, installation checks, applications, precautions and controlled acceptance evidence.

MODEL-SPECIFIC ENGINEERING NOTE

Install MU-TAIH12 51304337-100 only in its documented PM/APM/HPM Process Manager I/O position. Preserve the exact interfaces, wiring and configuration, then verify diagnostics and termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution under controlled conditions.

System Role and Architecture

Honeywell MU-TAIH12 51304337-100 is the MU-TAIH12 High-Level Analog Input/STI FTA used for termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution in a documented PM/APM/HPM Process Manager I/O installation. Confirm the complete identity and installed system configuration before

FUNCTION 1
Channels: 16

FUNCTION 2
Terminal type: Compression

FUNCTION 3
Mounting size: B

FUNCTION 4
Coating: Uncoated

MATCHED SYSTEM COMPONENTS

NO.	DOCUMENTED COMPONENT / ROLE
01	PM/APM/HPM Process Manager I/O
02	Matched PM/APM/HPM Process Manager I/O host and field interface
03	Documented power, signal, communication and grounding connections
04	Approved configuration, diagnostics and acceptance record

SYSTEM INTEGRATION RECORD

INTEGRATION ITEM	DOCUMENTED ROLE
Host identity	PM/APM/HPM Process Manager I/O
Interface role	termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution
Field / power context	documented PM/APM/HPM Process Manager I/O installed position
Commissioning evidence	Identity, wiring, configuration, diagnostics and controlled response recorded

INSTALLATION AND CONNECTION CHECKS

- 1

Confirm the complete MU-TAIH12 51304337-100 identity on the hardware and maintenance record.
- 2

Place the affected PM/APM/HPM Process Manager I/O process in the approved maintenance state.
- 3

Record the installed position, connectors, terminals, wiring and configuration before removal.
- 4

Isolate all documented power and field energy and apply ESD controls where required.

Technical Specifications

Technical values below are limited to the named product record and directly applicable manufacturer documentation.

PARAMETER	VALUE	PARAMETER	VALUE
Product type	HLAI/STI Field Termination Assembly	Mounting size	B
FTA model	MU-TAIH12	Coating	Uncoated
Manufacturer item number	51304337-100	Compliance execution	Non-CE part
Channels	16	Redundancy	Supported in the documented arrangement
Terminal type	Compression

ENGINEERING BOUNDARY

Confirm MU-TAIH12 51304337-100, its exact host, installed position, interfaces, configuration, diagnostics and controlled acceptance evidence before release.

PRE-INSTALLATION CHECKS

- 1

Confirm the complete MU-TAIH12 51304337-100 identity on the hardware and maintenance record.
- 2

Place the affected PM/APM/HPM Process Manager I/O process in the approved maintenance state.
- 3

Record the installed position, connectors, terminals, wiring and configuration before removal.
- 4

Isolate all documented power and field energy and apply ESD controls where required.

Applications and Engineering Context

MU-TAIH12 High-Level Analog Input/STI FTA

Provides termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution in the approved PM/APM/HPM Process Manager I/O architecture.

Installed-system maintenance

Preserves the documented slot, termination, wiring and configuration during replacement.

Controlled commissioning

Restores power and signals in the approved sequence and reviews diagnostics.

Acceptance verification

Confirms the intended channel, network or safety function before release.

TECHNICAL NOTE

Install MU-TAIH12 51304337-100 only in its documented PM/APM/HPM Process Manager I/O position. Preserve the exact interfaces, wiring and configuration, then verify diagnostics and termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution under controlled conditions.

MODEL-SPECIFIC ACCEPTANCE EVIDENCE

CHECK	ACCEPTANCE CONDITION
Identity	MU-TAIH12 51304337-100 recorded
Host / carrier	PM/APM/HPM Process Manager I/O
Physical interface	Installed terminals, ports and signals matched to the as-found record
Configuration	Approved Honeywell hardware and system configuration restored
Functional proof	Controlled test confirms termination of sixteen high-level analog or smart-transmitter inputs in the uncoated execution

IMPORTANT NOTICE

Confirm MU-TAIH12 51304337-100, its exact host, installed position, interfaces, configuration, diagnostics and controlled acceptance evidence before release.
