5453-203

Display Panel

Woodward lists 5453-203 as a display panel in Product Change Notification 06919 Rev. A. It is not identified there as a CPU module.

ORDER NUMBER

5453-203

DESIGNATION

PANEL - DISPLAY

RECORD

Product Change Notification 06919

REVISION

Rev. A, December 2014

SELECTION BOUNDARY

DISPLAY IDENTITY

Select the complete 5453-203 marking and compare the panel assembly with the as-found cabinet.

SYSTEM BOUNDARY

The change notice discusses legacy NetCon/MicroNet hardware; a display-panel replacement still requires the approved installed-system record.

NO CPU SUBSTITUTION

The notice separately lists CPU and display items. Do not treat an updated CPU number as a replacement identity for 5453-203.

Notice page 3: 5453-203, PANEL - DISPLAY, in the affected-parts listing.

Receiving and as-found comparison

NAMEPLATE

Confirm complete Woodward 5453-203 item marking and any revision on the removed panel.

INSTALLED LOCATION

Photograph the cabinet, panel position and connected equipment before disassembly.

DISPLAY CONDITION

Inspect the display face, mounting points and visible damage without inferring electrical ratings.

CONNECTOR RECORD

Record every connector, cable route and orientation from approved drawings.

SYSTEM SOFTWARE

Keep the existing control application and as-found system configuration record.

RELEASE EVIDENCE

Document the restored display response and site acceptance after controlled power-up.

The 2014 notification lists the display panel among affected legacy items; it does not make any other CPU or panel a drop-in substitute.

Eight-step replacement record

STEP 1

Verify the exact 5453-203 marking and cabinet location.

STEP 2

Place the legacy control system in the approved maintenance state.

STEP 3

Record mounting, cabling and all display-panel connections.

STEP 4

Inspect the replacement panel's identity and physical condition.

STEP 5

Restore every connection and support to the approved drawing.

STEP 6

Energize the system under the site's controlled procedure.

STEP 7

Prove the expected display response and associated diagnostics.

STEP 8

Retain the as-left record and responsible acceptance decision.
