

1

01 Readiness and operating boundary

Yokogawa FC11*A AS S9051BE-0 is a legacy control-system card identified by the FC11*A model and S9051BE-0 assembly marking together. Replacement requires an exact match of the installed station, slot, connectors, switch settings and board revision.

Confirm exact identity

Confirm the complete FC11*A AS S9051BE-0 marking before work.

Complete identity	FC11*A AS S9051BE-0
Card marking	FC11*A
Assembly marking	S9051BE-0

Establish the safe work boundary

Place the affected equipment in its approved maintenance state.

Identity	FC11*A AS S9051BE-0
Host	CENTUM-XL
Acceptance	Diagnostics and functional response

PAGE TRACE	REQUIRED ENTRY
Inspector	_____
Result	Pass / hold / corrective action
Record	Date, diagnostic state and release reference

2

02 Configuration and interface setup

FC11*A AS S9051BE-0 maintains a documented card position inside a CENTUM-XL station, where the two-part identity and as-found hardware arrangement govern compatibility.

Record the as-found configuration

Isolate connected energy and prove the circuit safe.

Card marking	FC11*A
Assembly marking	S9051BE-0
System family	CENTUM-XL

Map connections and settings

Photograph the slot, wiring, connectors and settings before removal.

Identity	FC11*A AS S9051BE-0
Host	CENTUM-XL
Acceptance	Diagnostics and functional response

3 03 Installation and service sequence

FC11*A AS S9051BE-0 maintains a documented card position inside a CENTUM-XL station, where the two-part identity and as-found hardware arrangement govern compatibility.

Restore the documented assembly

Match every documented interface and companion component.

Assembly marking	S9051BE-0
System family	CENTUM-XL
Installed position	Match station, rack and slot

Protect every interface

Restore mechanical retention, shielding and protective earth.

Identity	FC11*A AS S9051BE-0
Host	CENTUM-XL
Acceptance	Diagnostics and functional response

4

04 Verification and fault isolation

FC11*A AS S9051BE-0 maintains a documented card position inside a CENTUM-XL station, where the two-part identity and as-found hardware arrangement govern compatibility.

Verify the installed function

Review hardware, network and controller diagnostics after energization.

System family	CENTUM-XL
Installed position	Match station, rack and slot
Hardware match	Connectors, switches and revision

Isolate unexpected response

Functionally verify interface and control-card operation in the recorded CENTUM-XL station before service release.

Identity	FC11*A AS S9051BE-0
Host	CENTUM-XL
Acceptance	Diagnostics and functional response

FC11*A AS S9051BE-0

5 05 Acceptance and service handover

FC11*A AS S9051BE-0 maintains a documented card position inside a CENTUM-XL station, where the two-part identity and as-found hardware arrangement govern compatibility.

Complete the release record

Confirm the complete FC11*A AS S9051BE-0 marking before work.

Complete identity	FC11*A AS S9051BE-0
Card marking	FC11*A
Assembly marking	S9051BE-0

Retain acceptance evidence

Place the affected equipment in its approved maintenance state.

Identity	FC11*A AS S9051BE-0
Host	CENTUM-XL
Acceptance	Diagnostics and functional response
