1

01 Readiness and operating boundary

Reconcile the complete product marking, installed position and machine function before isolation.

Capture the installed identity

Confirm the complete 330106-00-04-10-02-00 marking and M10 x 1 reverse-mount position before work.

Complete item marking	330106-00-04-10-02-00
Base probe number	330106
Probe family	3300 XL 8 mm

Prove the work boundary

Match the installed extension cable and Proximitor Sensor to the retained total system length.

Identity	330106-00-04-10-02-00
Host	3300 XL 8 mm Proximity Transducer System
Acceptance	Isolation and label record

PAGE TRACE	REQUIRED ENTRY
Inspector	_____
Result	Pass / hold / corrective action
Record	Date, diagnostic state and release reference

2

02 Configuration and interface setup

Convert the as-found record into a controlled map of power, signal, mechanical and configuration interfaces.

Build the channel map

Record probe gap, mounting depth, cable route, connector condition and shield treatment before removal.

Base probe number	330106
Probe family	3300 XL 8 mm
Mounting form	Reverse mount

Classify every field circuit

Protect the 8 mm tip, cable and ClickLoc connection from impact, contamination and strain.

Identity	330106-00-04-10-02-00
Host	3300 XL 8 mm Proximity Transducer System
Acceptance	Channel map approved

3

03 Installation and service sequence

Install the exact hardware identity and rebuild each connection without changing the approved architecture.

Restore the physical assembly

Use the approved target material and mounting torque without forcing the threaded case.

Probe family	3300 XL 8 mm
Mounting form	Reverse mount
Case thread	M10 x 1

Apply controlled settings

Restore the probe cable and extension-cable connection without sharp bends or unsupported tension.

Identity	330106-00-04-10-02-00
Host	3300 XL 8 mm Proximity Transducer System
Acceptance	Assembly and settings restored

4

04 Verification and fault isolation

Energize under controlled conditions and observe every available channel, device and system diagnostic.

Observe supervised states

Set the operating gap with the receiving monitor in the controlled maintenance state.

Mounting form	Reverse mount
Case thread	M10 x 1
Probe-tip diameter	8.0 mm

Exercise fault indications

Verify static gap, dynamic response, alarm path and speed or phase reference before service release.

Identity	330106-00-04-10-02-00
Host	3300 XL 8 mm Proximity Transducer System
Acceptance	Supervision response recorded

5

05 Acceptance and service handover

Release the equipment only after identity, installation, diagnostics and functional results are recorded together.

Compile the acceptance package

Retain the measured response and final configuration for non-contact shaft position and vibration sensing.

Complete item marking	330106-00-04-10-02-00
Base probe number	330106
Probe family	3300 XL 8 mm

Authorize the handover

Attach the as-left diagnostic state and named release owner to the maintenance handover.

Identity	330106-00-04-10-02-00
Host	3300 XL 8 mm Proximity Transducer System
Acceptance	Release evidence complete
