

Schneider Electric TSX3710001

Micro PLC / Exact identity and technical profile

The technical decision for TSX3710001 is controlled by its exact manufacturer identity, published characteristics and documented TSX Micro 3710 boundary.

Exact product designation	TSX 3710 AC
Platform	TSX Micro
Controller family	TSX 3710
Family supply class	AC-supply controller
Family internal RAM	14 Kwords
Program backup	Integrated Flash EPROM in TSX 37 family

TECHNICAL MARKER

Use TSX3710001 as the exact product identity.

TECHNICAL MARKER

Treat the 3710 values as family architecture, not evidence for unlisted I/O options.

TECHNICAL MARKER

Archive the application and retained data before intervention.

TECHNICAL MARKER

Record the actual terminal, expansion and communication arrangement.

Technical boundary

The exact model and its published data govern this reference. Similar family names, suffixes or physical appearance do not establish the same electrical or software behavior.

Identity evidence	Read TSX3710001 from the installed label and procurement record
Function evidence	Confirm the published micro plc role in the TSX Micro 3710 system
Configuration evidence	Retain the project, mapping, range, address or interface assigned to this position
Release evidence	Link final diagnostics to a witnessed field or operator response

TECHNICAL DECISION

Accept TSX3710001 only when its identifier and installed-system role agree.

CHANGE BOUNDARY

Any redesign beyond the documented TSX3710001 position requires separate engineering approval.

Schneider Electric TSX3710001

Micro PLC / Published characteristics

This matrix groups the published TSX3710001 characteristics that control identification, configuration and engineering review. Each entry remains tied to the exact micro plc record.

Exact product designation	TSX 3710 AC
Platform	TSX Micro
Controller family	TSX 3710
Family supply class	AC-supply controller
Family internal RAM	14 Kwords
Program backup	Integrated Flash EPROM in TSX 37 family
Programming terminal link	TER serial link
Family expansion position	One available slot in TSX 3710 architecture
Lifecycle	Post-commercialisation
Configuration source	Installed application and hardware record

INTERPRETATION

Use every TSX3710001 value with the exact installed configuration.

DESIGN RECORD

Retain the drawing, project and channel or interface assignments that make TSX3710001 data actionable.

Nameplate check	Manufacturer and full reference agree with the controlled record
Range check	Published operating or signal data agree with the configured use
Interface check	Backplane, terminal, cable, network or memory arrangement is documented
Limit check	Loading, channel count, supply or lifecycle constraint is reviewed
Evidence close	Source title and applicable product record are retained with the decision

NO BORROWED VALUES

Another Schneider Electric suffix cannot fill a missing TSX3710001 parameter.

ENGINEERING OUTPUT

Record the exact value used, its purpose and any unresolved item before selection.

Schneider Electric TSX3710001

Micro PLC / System role and data flow

Legacy machine control
Executes the retained TSX Micro application.

Compact AC-supply PLC
Uses the documented TSX 3710 AC controller execution.

TER-port maintenance
Supports the approved programming and diagnostic connection.

Exact controller renewal
Restores the project and physical configuration of TSX3710001.

Signal and configuration path

Field layer	Sensors, loads, terminal or operator interface assigned by the design
Module layer	TSX3710001 performs its published micro plc role
Control layer	PLC project, address map or runtime application interprets the exchanged data
Acceptance layer	Diagnostics and intended process response are witnessed together

Engineering boundary

Application examples describe system roles only. They do not establish automatic interchangeability, replacement approval or suffix equivalence.

Observed input	Field, network or operator condition presented to TSX3710001
Published action	The documented micro plc function processes that condition
Configured interpretation	PLC logic, HMI project or station mapping assigns system meaning
Expected output	A defined state, value, message or command is produced
Acceptance proof	The complete path is witnessed under controlled conditions

APPLICATION RECORD
Tie each TSX3710001 use case to the installed drawing or project tag.

EXCEPTION CONTROL
Document and resolve any behavior that differs from the approved response.

Model-specific questions

What device identity or role does Schneider Electric TSX3710001 publish?

TSX3710001 is documented with TSX 3710 AC; this value belongs to the verified product configuration.

Which controller family is associated with Schneider Electric TSX3710001?

The manufacturer record for TSX3710001 specifies TSX 3710. Preserve it through selection, installation and acceptance.

Which family internal ram is associated with Schneider Electric TSX3710001?

The published TSX3710001 value is 14 Kwords. The installed configuration must remain within that boundary.

Which programming terminal link must be retained for Schneider Electric TSX3710001?

Record TER serial link for TSX3710001 and verify the field arrangement against the controlled drawing or project.

Which platform is associated with Schneider Electric TSX3710001?

Use TSX Micro as the TSX3710001 platform reference and resolve any field discrepancy before release.

What family supply class rating is specified for Schneider Electric TSX3710001?

Schneider Electric identifies the family supply class as AC-supply controller; keep that exact entry in the TSX3710001 record.

When reviewing TSX3710001, what is the published program backup?

For TSX3710001, the manufacturer states Integrated Flash EPROM in TSX 37 family. Do not replace it with a nearby suffix value.

Which family expansion position is associated with Schneider Electric TSX3710001?

The exact-model source gives One available slot in TSX 3710 architecture. Use it together with the actual TSX3710001 nameplate and installation record.

Decision closeout

Close the TSX3710001 technical review with the exact identifier, applicable published limits and the installed configuration assumptions explicitly recorded.

Question coverage	Identity, function, configuration and field handling addressed
Open item	Any unanswered exact-model point is listed without guessed data
Decision owner	Responsible engineering or maintenance role identified
Supporting record	Drawing, project revision, readings and witnessed result attached

APPROVAL

The TSX3710001 decision is accepted only within the documented scope.

REVIEW TRIGGER

A different suffix, wiring arrangement, project or application requires a new review.
