Siemens 6ES5947-3UR21

Technical Reference

Siemens 6ES5947-3UR21 is a CPU 947R F central processing unit for the SIMATIC S5-155H programmable controller. It executes the STEP 5 control program and coordinates the controller's rack-based automation tasks.

PRODUCT ROLE AND VERIFIED FEATURES

Feature 1

Identified by Siemens as a SIMATIC S5 CPU 947R F central processing unit.

Feature 2

Assigned to the S5-155H programmable-controller platform.

Feature 3

Executes the stored STEP 5 user program and controller operating functions.

Feature 4

Supports the redundant processor role defined for the S5-155H architecture.

VERIFIED DATA SNAPSHOT

Product family	SIMATIC S5
Processor type	CPU 947R F
Controller system	S5-155H
Programming environment	STEP 5

SYSTEM RELATIONSHIP

Field device → **Product interface** → **System channel** → **Verified response**

Technical profile

Verified technical values for the complete product string are arranged below for selection and engineering review.

Product family	SIMATIC S5
Processor type	CPU 947R F
Controller system	S5-155H
Programming environment	STEP 5
Module role	Central processing unit
Lifecycle	Discontinued product
System architecture	Redundant S5-155H processor

SELECTION ANCHORS

- Identified by Siemens as a SIMATIC S5 CPU 947R F central processing unit.
- Assigned to the S5-155H programmable-controller platform.
- Executes the stored STEP 5 user program and controller operating functions.
- Supports the redundant processor role defined for the S5-155H architecture.

IMPORTANT NOTICE	Use the values as one matched configuration. Do not substitute a nearby ordering code without a separate check.

MANUFACTURER SOURCE CONTROLS

Manufacturer source	Siemens Industry Mall product record for 6ES5947-3UR21
Evidence boundary	Technical statements are limited to the identified product or applicable manufacturer family.
Selection control	Use the complete ordering string and verify the installed system before purchase or installation.

ADDITIONAL ENGINEERING CHECKS

Which installation records should accompany Siemens 6ES5947-3UR21?	Record the complete article number, redundant cpu module position, connections, controlled settings and functional test result.
When can Siemens 6ES5947-3UR21 return to service?	Return it to service only after diagnostics, communication, interlocks and the intended system response meet the approved acceptance criteria.

System role and architecture

Field device → **Product interface** → **System channel** → **Verified response**

APPLICATION POINTS

Legacy machine control

Run the existing STEP 5 control program in a maintained S5-155H rack.

Process sequencing

Coordinate deterministic logic, interlocks and output decisions in the installed controller.

Plant maintenance

Restore the documented processor position without changing the approved application program.

System recovery

Return the controller to its recorded startup state after an exact-article replacement.

INTEGRATION RECORD

Identity	Record the complete marking and installed position.
Mechanical interface	Confirm mounting, support, clearance and connector engagement.
Electrical interface	Confirm signal path, shield, common and receiving-channel assignment.
Configuration	Retain the controlled channel settings and acceptance criteria.
Functional evidence	Record the expected static value, dynamic response and system status.

The redundant cpu module serves a defined role in its documented SIMATIC system. Match the rack, interfaces, configuration and program safeguards before the controlled system returns to service.

ENGINEERING REVIEW QUESTIONS

What processor type is Siemens 6ES5947-3UR21?	It is the Siemens SIMATIC S5 CPU 947R F central processing unit.
Which controller platform uses Siemens 6ES5947-3UR21?	Siemens assigns it to the S5-155H programmable-controller system.
Which programming environment applies to Siemens 6ES5947-3UR21?	The controller application uses the SIMATIC STEP 5 environment.
What should be backed up before replacing Siemens 6ES5947-3UR21?	Back up the user program, hardware configuration and operating parameters.

Engineering checks and acceptance

PRODUCT PRECAUTIONS

01	Confirm the complete 6ES5947-3UR21 article number and CPU 947R F designation before removing the installed CPU.
02	Verify that the host controller is the documented S5-155H platform.
03	Back up the STEP 5 user program, hardware configuration and operating parameters.
04	Record rack slot, switch positions, memory media and interface connections.
05	Remove power and follow site electrostatic-discharge controls before handling the module.
06	Do not transfer memory media until the required CPU state and site procedure are confirmed.
07	Check startup indicators, controller mode and I/O communication after installation.
08	Validate interlocks and the controlled machine sequence before returning outputs to service.

RELEASE EVIDENCE

Exact identity	Product marking and intended system position agree.
Interface condition	Mounting, connectors, terminals and cable routing are secure.
Signal response	The expected static and dynamic behavior has been observed.
Protection state	Channel status, alarms and controlled bypass state are restored.

IMPORTANT NOTICE	Use the complete article number and verify the intended SIMATIC system before installation.

APPLICATION BOUNDARIES

Legacy machine control	Run the existing STEP 5 control program in a maintained S5-155H rack.
Process sequencing	Coordinate deterministic logic, interlocks and output decisions in the installed controller.
Plant maintenance	Restore the documented processor position without changing the approved application program.
System recovery	Return the controller to its recorded startup state after an exact-article replacement.

Technical questions and related models

MODEL-SPECIFIC QUESTIONS

What processor type is Siemens 6ES5947-3UR21?	It is the Siemens SIMATIC S5 CPU 947R F central processing unit.
Which controller platform uses Siemens 6ES5947-3UR21?	Siemens assigns it to the S5-155H programmable-controller system.
Which programming environment applies to Siemens 6ES5947-3UR21?	The controller application uses the SIMATIC STEP 5 environment.
What should be backed up before replacing Siemens 6ES5947-3UR21?	Back up the user program, hardware configuration and operating parameters.
Which physical details must be recorded before removing Siemens 6ES5947-3UR21?	Record the rack slot, switch positions, memory media and every connected interface.
What verifies Siemens 6ES5947-3UR21 after startup?	Confirm CPU status, operating mode, I/O communication, interlocks and the controlled sequence.
