1

01 Readiness and operating boundary

Siemens 6DS1300-8AB is a TELEPERM spare-part interface module for a monochrome monitor using a 20 mA line-current interface.

Confirm exact identity

Confirm the complete Siemens 6DS1300-8AB marking before work.

Exact article	6DS1300-8AB
Product family	TELEPERM
Module type	Monitor interface module

Establish the safe work boundary

Place the TELEPERM system and monitor path in the approved maintenance state.

Identity	6DS1300-8AB
Host	TELEPERM
Acceptance	Diagnostics and functional response

PAGE TRACE	REQUIRED ENTRY
Inspector	_____
Result	Pass / hold / corrective action
Record	Date, diagnostic state and release reference

02 Configuration and interface setup

Siemens 6DS1300-8AB forms the documented electrical interface between a TELEPERM system position and its monochrome monitor through a 20 mA line-current path.

Record the as-found configuration

Record the cabinet position, monitor identity and every connected conductor.

Product family	TELEPERM
Module type	Monitor interface module
Display context	Monochrome monitor

Map connections and settings

Prove the 20 mA line-current circuit safe before disconnecting the module.

Identity	6DS1300-8AB
Host	TELEPERM
Acceptance	Diagnostics and functional response

PAGE TRACE	REQUIRED ENTRY
Inspector	_____
Result	Pass / hold / corrective action
Record	Date, diagnostic state and release reference

03 Installation and service sequence

Siemens 6DS1300-8AB forms the documented electrical interface between a TELEPERM system position and its monochrome monitor through a 20 mA line-current path.

Restore the documented assembly

Inspect connector condition and preserve the original wiring assignment.

Module type	Monitor interface module
Display context	Monochrome monitor
Electrical interface	20 mA line-current interface

Protect every interface

Do not substitute a generic display or video interface for the documented path.

Identity	6DS1300-8AB
Host	TELEPERM
Acceptance	Diagnostics and functional response

PAGE TRACE	REQUIRED ENTRY
Inspector	_____
Result	Pass / hold / corrective action
Record	Date, diagnostic state and release reference

4

04 Verification and fault isolation

Siemens 6DS1300-8AB forms the documented electrical interface between a TELEPERM system position and its monochrome monitor through a 20 mA line-current path.

Verify the installed function

Review module and monitor indications after controlled energization.

Display context	Monochrome monitor
Electrical interface	20 mA line-current interface
Supply status	Spare-part article

Isolate unexpected response

Verify stable display operation before returning the station to service.

Identity	6DS1300-8AB
Host	TELEPERM
Acceptance	Diagnostics and functional response

PAGE TRACE	REQUIRED ENTRY
Inspector	_____
Result	Pass / hold / corrective action
Record	Date, diagnostic state and release reference

5

05 Acceptance and service handover

Siemens 6DS1300-8AB forms the documented electrical interface between a TELEPERM system position and its monochrome monitor through a 20 mA line-current path.

Complete the release record

Confirm the complete Siemens 6DS1300-8AB marking before work.

Exact article	6DS1300-8AB
Product family	TELEPERM
Module type	Monitor interface module

Retain acceptance evidence

Place the TELEPERM system and monitor path in the approved maintenance state.

Identity	6DS1300-8AB
Host	TELEPERM
Acceptance	Diagnostics and functional response
