Westinghouse 1C31192G01

Complete Product Information

Westinghouse 1C31192G01 provides the field interface for the tachometer signal used by the 1C31189G01 Ovation speed-detector electronics module.

WHAT THIS PRODUCT DOES

Westinghouse 1C31192G01 serves as a speed detector personality module in the Ovation I/O subsystem. It interfaces tachometer field input with 1C31189G01 speed-detector electronics module.

Product characteristic 1

Provides one speed-sensor interface for the documented speed detector personality module function.

Product characteristic 2

Handles tachometer field input through the specified Ovation I/O subsystem.

Product characteristic 3

Works with 1C31189G01 speed-detector electronics module.

Product characteristic 4

The personality module supports the terminal connection for the documented speed-detector subsystem.

PRODUCT-PAGE TECHNICAL SNAPSHOT

Subsystem	Ovation speed detector
Electronics module	1C31189G01
Sensor signal	Sinusoidal or pulse-train tachometer
Measurement outputs	16-bit overspeed and 32-bit speed-regulation values

IMPORTANT NOTICE Use 1C31192G01 only with 1C31189G01 speed-detector electronics module; verify the field interface and controlled configuration before energizing the subsystem.

Features and technical data

TECHNICAL DATA SHOWN ON THE PRODUCT PAGE

Subsystem	Ovation speed detector
Electronics module	1C31189G01
Sensor signal	Sinusoidal or pulse-train tachometer
Measurement outputs	16-bit overspeed and 32-bit speed-regulation values
Input range	0.72 Hz to 65,535 Hz across the documented outputs

FEATURE INTERPRETATION

Product identity

Provides one speed-sensor interface for the documented speed detector personality module function.

System role

Handles tachometer field input through the specified Ovation I/O subsystem.

Service context

Works with 1C31189G01 speed-detector electronics module.

Return-to-service focus

The personality module supports the terminal connection for the documented speed-detector subsystem.

SIGNAL OR CONTROL PATH

Tachometer → **Personality module** → **Speed electronics** → **Ovation controller**

The speed detector personality module belongs in the controlled Ovation I/O subsystem and works with 1C31189G01 speed-detector electronics module. Its field connection, companion hardware and project configuration must be reviewed together before the channel is returned to service.

PRODUCT-PAGE TECHNICAL QUESTIONS

What function does Westinghouse 1C31192G01 perform?	It provides the field interface for the tachometer signal used by the 1C31189G01 Ovation speed-detector electronics module.
How many channels are associated with Westinghouse 1C31192G01?	The documented configuration provides one speed-sensor interface.
Which signal path is used by Westinghouse 1C31192G01?	It is used for tachometer field input within the specified subsystem.

Common applications

The application groups below reproduce the model-specific uses presented on the product page and connect each use to a practical verification point.

Installed-base maintenance

Restores the documented speed detector personality module position without changing the approved system architecture.

Loop or channel service

Supports verification of tachometer field input at the assigned control-system channel.

Planned replacement

Provides an exact-identity replacement path when 1C31189G01 speed-detector electronics module and the field interface have been confirmed.

Commissioning support

Allows the responsible engineer to prove wiring, configuration, status and response for one speed-sensor interface.

APPLICATION VERIFICATION MAP

Installed-base maintenance	Confirm the documented system position and the required operating function.
Loop or channel service	Compare the restored connection or control path with the approved record.
Planned replacement	Check the physical interface and the retained configuration before startup.
Commissioning support	Record diagnostics and the final controlled response before release.

INFORMATION CARRIED INTO THE WORK RECORD

Identity record

Complete marking and assigned system position.

Connection record

Connector, conductor and interface arrangement as found.

Configuration record

Controlled settings, application data and option state.

Acceptance record

Observed status, response and release decision.

IMPORTANT NOTICE

Use the complete product identifier for every application review; a related product link is not evidence of interchangeability.

APPLICATION QUESTIONS

Which signal path is used by Westinghouse 1C31192G01?	It is used for tachometer field input within the specified subsystem.
Which companion hardware must be checked for Westinghouse 1C31192G01?	Confirm 1C31189G01 speed-detector electronics module and the project-specific base or terminal arrangement.
What technical values should be verified before installing Westinghouse 1C31192G01?	Verify Ovation speed detector; also confirm 1c31189g01 and every applicable range or wiring selection.

Product precautions and questions

EIGHT MODEL-SPECIFIC PRECAUTIONS

01	Match the complete 1C31192G01 marking to the work order and installed position before removal.
02	Confirm 1C31189G01 speed-detector electronics module before making or breaking any field connection.
03	Keep the assigned tachometer field input within the documented subsystem and range.
04	Record terminal designations, polarity, common and shield treatment before disconnecting conductors.
05	Inspect module seating, connector keying, terminal condition and strain relief before power is restored.
06	Restore the controlled channel configuration, range selection and alarm or timeout behavior after installation.
07	Check local indicators and controller diagnostics for internal, communication or channel faults during commissioning.
08	Prove the intended response across one speed-sensor interface and record the acceptance result before release.

FREQUENTLY ASKED TECHNICAL QUESTIONS

What function does Westinghouse 1C31192G01 perform?	It provides the field interface for the tachometer signal used by the 1C31189G01 Ovation speed-detector electronics module.
How many channels are associated with Westinghouse 1C31192G01?	The documented configuration provides one speed-sensor interface.
Which signal path is used by Westinghouse 1C31192G01?	It is used for tachometer field input within the specified subsystem.
Which companion hardware must be checked for Westinghouse 1C31192G01?	Confirm 1C31189G01 speed-detector electronics module and the project-specific base or terminal arrangement.

IMPORTANT NOTICE	Use 1C31192G01 only with 1C31189G01 speed-detector electronics module; verify the field interface and controlled configuration before energizing the subsystem.

RELEASE CHECKLIST

Identity accepted	The complete product marking and assigned system position agree.
Interfaces accepted	Connections, retention and controlled configuration match the recorded condition.
Response accepted	Diagnostics and the intended technical response have been documented.

FAQ, source record and related models

ADDITIONAL TECHNICAL QUESTIONS

What technical values should be verified before installing Westinghouse 1C31192G01?	Verify Ovation speed detector; also confirm 1c31189g01 and every applicable range or wiring selection.
What connection details should be recorded for Westinghouse 1C31192G01?	Record terminal identifiers, polarity, common, shield termination, connector keying and the assigned channel before disconnection.
Which diagnostics should be reviewed when commissioning Westinghouse 1C31192G01?	Review the applicable power, communication, internal-fault and channel-status indications, then compare the controller status with the expected field condition.
Can a nearby ordering code replace Westinghouse 1C31192G01 without an engineering check?	No. Match the complete identifier, companion hardware, signal range, wiring and controlled project configuration before substitution.

MANUFACTURER EVIDENCE RECORD

Manufacturer source	Emerson Process Management, Ovation I/O Reference Manual R3-1150 Rev 3, Section 24, February 2003.
Evidence boundary	Technical statements are limited to the identified product or applicable manufacturer family.
Selection control	Use the complete ordering string and verify the installed system before purchase or installation.
