HIMA F3316

Planar F Legacy Module

01 / PREPARATION, RESTORATION AND ACCEPTANCE

Planning aid for HIMA F3316. Use the applicable equipment instructions and authorized site procedure for physical work and test execution. The checks below apply the documented model distinctions; they do not introduce undocumented device limits.

Controlled work sequence

01 / Read the complete type marking

Distinguish F3316 from F3316A on the actual unit and in the equipment record. The source repeats part number 98 4331660, so a part number alone is not the complete identity check.

02 / Reference the correct compatibility row

Use the F3316 row for its recorded F3316A relationship. Keep a later alternative proposal separate; the register does not make every relationship transitive.

03 / Retain the installed circuit baseline

Preserve connection assignments and the existing circuit function. Use the applicable Planar F documentation for the work method and any electrical limits.

04 / Document the restored circuit

Record whether F3316 or F3316A was installed and run the authorized circuit verification. Retain any approved change to the original equipment list.

Model-specific acceptance checks

Subject	Expected evidence
Suffix identification	The physical marking and as-left record preserve any A suffix.
Relationship cited	The work package uses the F3316-to-F3316A entry correctly.
Circuit acceptance	The actual connected circuit meets its approved functional test.

HIMA F3316

Planar F Legacy Module

02 / EXCEPTION HANDLING AND REFERENCE SUPPORT

Identical part-number text

The historical register shows the same number for two type entries. Record the type marking as well as the number.

A third-generation replacement is offered

Assess it as a separate migration. A successor of a successor is not automatically the same installation change.

If a check fails

Suffix identification: Resolve a label or purchase-record discrepancy.

Relationship cited: Do not extend the relationship to an unreviewed third model.

Circuit acceptance: Use the circuit documentation, not a borrowed successor rating.

Technical reference record

List of discontinued products | Rev. 18, August 2012 - Page 2 of 6; F 3316 and F 3316A rows, read separately.
