HIMA F3316

Planar F Legacy Module

01 / DOCUMENTED IDENTITY AND ENGINEERING DISTINCTIONS

F3316 is a Planar F lifecycle identity with F3316A recorded as its alternative. Both function and pin compatibility are marked yes in the F3316 row, while the later F3316A lifecycle entry is a separate record that must not be merged into the original specification.

F3316 original entry → **Function yes / pins yes** → **F3316A alternative entry**

Application and selection

Keep the A suffix visible

The source distinguishes F3316 from F3316A even though the displayed part number is the same. Preserve the actual model suffix in the service record.

Compatibility is a scoped statement

The two yes entries support the stated F3316-to-F3316A relationship. They do not establish compatibility with any other switching or I/O module.

Later product data remains separate

The F3316A row has its own lifecycle dates and technical remark. Do not silently apply that remark or the later 22120 alternative to F3316.

Published product facts

System classification	Planar F
Register identity	F 3316
Listed part number	98 4331660
Discontinuation	1 April 1997
End of life	31 March 2007
Named alternative	F3316A
Function compatibility	Yes, in the F3316 row
Pin compatibility	Yes, in the F3316 row

HIMA F3316

Planar F Legacy Module

Model-specific engineering case

If an approved service proposal replaces F3316 with F3316A, record the suffix change explicitly and confirm the actual circuit against the applicable drawings. The shared part-number text in the historical list is a reason to capture the physical type marking, not a reason to discard it.

Technical reference record

List of discontinued products | Rev. 18, August 2012 - Page 2 of 6; F 3316 and F 3316A rows, read separately.
