Installation Verification Guide

F7105A

Pre-installation identity and document checks

An Apter Power verification checklist for F7105A. Apply the manufacturer instructions and approved site procedure for actual work; this is not a wiring or commissioning manual.

01 Match the A-suffix module

Compare F7105A and part number 98 4710560 with the actual Planar F module. Retain the A suffix in all service records.

02 Separate function from pin compatibility

The alternative 90100 is function-compatible but not pin-compatible with F7105A. Do not treat it as a direct plug-in exchange.

03 Review the connection change

For a proposed 90100 replacement, have the responsible engineer establish the approved terminal mapping and installation changes before work.

04 Confirm service and release

F7105A has an end-of-life date of 31 March 2022. Confirm the support plan and carry out the installation-specific acceptance procedure before return to service.

Reference basis: HIMA List of Discontinued Products, Rev. 18, August 2012.
