Installation Verification Guide

# F2201

## Pre-installation identity and document checks

An Apter Power verification checklist for F2201. Apply the manufacturer instructions and approved site procedure for actual work; this is not a wiring or commissioning manual.

## 01 Match both identifiers

Compare F2201 and part number 98 1220102 with the actual module label and the installed Planar F records.

## 02 Review the installed circuit

Have the maintenance team match the module to the applicable Planar F circuit drawings. A series name alone does not establish a replacement connection.

## 03 Confirm the service decision

F2201 has an end-of-life date of 31 March 2012. Confirm current support and any proposed replacement before planning the work.

## 04 Follow the approved work procedure

Use the applicable manufacturer instructions and site-approved isolation, connection and functional-test procedure. This document does not provide a wiring diagram.
