6EP1334-1SL12

01 / Identity and system function

SITOP 24 V Power Supply

Siemens 6EP1334-1SL12 is a SITOP industrial power supply with a regulated 24 V DC, 10 A output. It supplies a suitable control cabinet load from a selected 120/230 V AC input, supporting PLC, I/O and auxiliary equipment within the engineered power budget. The line-voltage selection and wiring must match the installed supply.

Product position

Technical characteristics

Product type	SITOP regulated power supply
Nominal output	24 V DC
Rated output current	10 A
Selectable input	120/230 V AC, 50/60 Hz

System integration

The supply operates at 50/60 Hz and provides a 24 V output with a stated ±3% tolerance. Siemens specifies less than 150 mV output ripple, automatic restart after a short circuit, DIN-rail mounting and IP20 protection. The 0 to +60 °C operating range and required installation clearances must be considered with the enclosure's thermal design.

6EP1334-1SL12

02 / Engineering data and service scope

Further characteristics

Output tolerance	±3%
Output ripple	<150 mV
Operating temperature	0 to +60 °C
Protection	IP20

Use the unit in cabinet power distribution where the total continuous load, startup current and protection coordination suit a 10 A SITOP supply. During replacement, compare the existing input selector position, output distribution, grounding, breaker and load current. Verify the actual output voltage and connected control functions after energization.

Applicability

The characteristics above describe the identified SITOP execution of 6EP1334-1SL12. Optional functions, connected devices and installed revisions must be checked against the complete marking and approved project configuration.

Technical basis

Siemens SITOP operating instructions, 6EP133x-1SL1x series, exact 6EP1334-1SL12 rating.

What is the product type of Siemens 6EP1334-1SL12?

SITOP regulated power supply.

What is the nominal output of Siemens 6EP1334-1SL12?

24 V DC.
