6ES7193-7DA20-0AA0

01 / Identity and system function

TM-PS-A Terminal Module

Siemens 6ES7193-7DA20-0AA0 is the TM-PS-A terminal module for a SIMATIC ET 200iSP station. It provides the terminal and mounting interface for the station's corresponding power-supply module. The terminal module is a carrier and connection element, not the power supply itself.

Product position

Technical characteristics

Product type	TM-PS-A terminal module
Distributed I/O family	SIMATIC ET 200iSP
Function	Carrier and terminal interface for power supply
Associated supply types	PS AC 120/230 V or PS DC 24 V, per station execution

System integration

The Siemens ET 200iSP instructions associate TM-PS-A with the PS AC 120/230 V and PS DC 24 V supply executions, subject to the station configuration and product version. A redundant arrangement uses a different terminal-module variant. The installed supply, wiring and station layout therefore need separate checks before treating another TM-PS module as equivalent.

02 / Engineering data and service scope

Further characteristics

Redundancy	TM-PS-B is a separate variant

ET 200iSP stations use this terminal position as part of their distributed I/O power architecture. It is relevant during station build, maintenance and replacement of a damaged power-supply carrier. Preserve the terminal assignment, supply type and approved station arrangement before disassembly, then check the station indication and connected I/O after restoration.

Applicability

The characteristics above describe the identified SIMATIC ET 200iSP execution of 6ES7193-7DA20-0AA0. Optional functions, connected devices and installed revisions must be checked against the complete marking and approved project configuration.

Technical basis

Siemens SIMATIC ET 200iSP operating instructions, TM-PS-A order code 6ES7193-7DA20-0AA0.

What is the product type of Siemens 6ES7193-7DA20-0AA0?

TM-PS-A terminal module.

What is the distributed i/o family of Siemens 6ES7193-7DA20-0AA0?

SIMATIC ET 200iSP.

What is the function of Siemens 6ES7193-7DA20-0AA0?

Carrier and terminal interface for power supply.
