KJ3002X1-BF1 12P1732X082 VE4003S6B1

Emerson / DeltaV RTD input card

Installation and commissioning checks for Emerson KJ3002X1-BF1 12P1732X082 VE4003S6B1.

01 Identify the installed configuration

Before replacement, preserve the RTD channel map, terminal wiring, host release and any redundant pairing. Compare the complete KJ3002X1-BF1 12P1732X082 VE4003S6B1 marking with the offered unit and confirm the included termination hardware in the quotation. Commission each affected channel against its approved loop or I/O test.

02 Prepare the change

Record the complete marking, companion hardware and project settings before removing the installed item.

01 Match the complete marking

Compare KJ3002X1-BF1 12P1732X082 VE4003S6B1 with the installed label, part number and any revision.

02 Preserve the configuration

Record the existing channel assignment, host release and termination arrangement.

03 Review the field connection

Check the RTD wiring and the approved circuit drawing before transfer.

03 Fit and configure

04 Protect the process

Place affected loops in their approved safe state and isolate power as required.

05 Handle the hardware

Use the site electrostatic-discharge and connector handling procedure.

06 Accept the replacement

Verify recognition, channel behavior and diagnostics against the pre-service record.

Source and application boundary

Emerson DeltaV M-series Traditional I/O Product Data Sheet, September 2023.

VE4003S6B1 catalog characteristics describe the documented assembly. Confirm applicability of those characteristics to the complete KJ3002X1-BF1 12P1732X082 VE4003S6B1 physical marking and installed termination arrangement.
