TC520 3BSE001449R1

Technical Reference | verified identity and ratings

ABB identifies TC520 as the System Status Collector under article 3BSE001449R1 in AC 450 and AC 460 spare-parts references. The available ABB listing does not establish a module voltage, channel count, pinout or interchangeability across installations.

Verified technical data

Product family	Advant Master
Exact type	TC520
ABB article	3BSE001449R1
Functional designation	System Status Collector
Published AC 450 listing	Listed
Published AC 460 listing	Listed

Status-system boundary

A spare-parts listing establishes type and system family. It does not describe the active status signals or their terminal mapping in an individual AC 450 or AC 460 cabinet.

Evidence and applicability

ABB Advant Master AC 450 / AC 460 parts and repair services list, 4HZG000081 Rev A, identifies TC520 article 3BSE001449R1 as a System Status Collector.

The ABB document confirms identity and AC 450 / AC 460 parts-list placement; it does not publish a TC520-specific voltage, channel count, interface rating or pinout.
